Computer Physics Communications

Contents to volume 92

Computational physics

Homeier, H.H.H. and E.J. Weniger
On remainder estimates for Levin-type sequence transformations 1

Liang, S.
A perfect Hashing function for exact diagonalization of many-body systems of identical particles 11

Nguyen, M.C., P. Santini and P. Erdös
Numerical calculation of correlation functions by boundary condition averaging: test on the one-dimensional Hubbard model 16

Ida, M. and T. Yabe
Implicit CIP (Cubic-Interpolated Propagation) method in one dimension 21

Aro, C.J. and G.H. Rodrigue
Preconditioned time differencing for stiff ODEs in diurnal atmospheric kinetics 27

Nieto, A.
Evaluating sums over the Matsubara frequencies 54

Kaneko, T.
A Feynman-graph generator for any order of coupling constants 127

Jaun, A., K. Appert, J. Vaclavik and L. Villard
Global waves in resistive and hot tokamak plasmas 153

Homeier, H.H.H., S. Rast and H. Krienke
Iterative solution of the Ornstein–Zernike equation with various closures using vector extrapolation 188

Mignani, S. and R. Rosa
The moving block bootstrap to assess the accuracy of statistical estimates in Ising model simulations 203

Marín, M. and P. Cordero
An empirical assessment of priority queues in event-driven molecular dynamics simulation 214

Mata, G.J. and E. Pestana
A general purpose algorithm for the integration of functions with power-law singularities of arbitrary exponent 225

Widmann, A.H. and U.W. Suter
Parallelization of a Monte Carlo algorithm for the simulation of polymer melts 229

Computer programs in physics

Graudenz, D.
PROJET: Jet cross sections in deeply inelastic electron proton scattering. Version 4.1 65

Lučić, V.
Dill: an algorithm and a symbolic software package for doing classical supersymmetry calculations 90

Fritzsche, S. and I.P. Grant
A program for the complete expansion of *jj*-coupled symmetry functions into Slater determinants 111

Vrahatis, M.N., O. Ragos, T. Skiniotis, F.A. Zafiropoulos and T.N. Grapsa
RFSFNS: A portable package for the numerical determination of the number and the calculation of roots of Bessel functions 252

Garrote, E., R. Capote and R. Pedrosa
Single-particle calculations in an axially deformed Woods–Saxon potential with Cassinian ovals parametrization of the shape deformation 267

Roy, U., L.J. Dubé, P. Mandal and N.C. Sil
Evaluation of a general three-denominator Lewis integral 277

Berrington, K.A., W.B. Eissner and P.H. Norrington
RMATRX1: Belfast atomic *R*-matrix codes 290
